Partner for End to End Networking & Security Solutions

AirLive® is a worldwide renowned brand specializing in networking solutions. With over 24 years experience in the network Security and Communication industry, AirLive®, powered by OvisLink Corp., is always committed to providing high quality IT products that meet customers' requirements for various applications. In the new Era, AirLive® innovations can be perfect for SI and System providers for completing Smart business solutions. Top notch R&D integrates the best hardware and software elements that guarantee system reliability and stability.

AirLive Smart solutions suitable for various applications, such as

- Smart Building
- Smart City / manufacturing
- Smart Communications / transportation
- Smart Life Z-Wave IoT for home automation and safety

AirLive® Product Unique Features:

- Smart Life Z-wave IoT kits for home automation and home safety
- Smart City / manufacturing:
AirLive Industrial Ring managed or unmanaged Switch
AirLive 4G/LTE, AirLive Network Camera
- Smart Communications/Transportation:
AirLive Industrial grade 9V~36V 4G/LTE gateway
Industrial grade serial to 4G/LTE M2M device
AirLive 4G/LTE outdoor Gateway
- Smart building:
AirLive auto-topology managed Switch or PoE switch
AirLive PoE, LAN Switch or Industrial switch
AirLive IP Camera, Wi-Fi devices with central management

AirLive has been certificated with the ISO9001 as confirmation of the high quality products and services AirLive delivers. At AirLive, we offer more personalized relationship and strategic alliance for partners. We support partners on customization to ensure the best user experience possible.

AIRLIVE Value

- Personalized relationship
- Strategic alliance
- Customization
- Strong application integration support
- Latest innovative products

Topology Device Managed POE Switch

Overview

The AirLive Topology Device Managed PoE Switch series are more than a SNMP management switches. The series switches support advanced management such as Auto-Topology, E-Map, ONVIF live view, AP management and graphical VLAN group setting. PoE device guard that will auto recover your crashed PoE AP/Camera. These unique features will help you to manage your network graphically. It also brings down maintenance cost and increases uptime. Managing Your Network has just become easier.

Highlights

- ▶ 802.3at/af PoE Gigabit Switches
- ▶ Full PoE power, 370W, 250W, or 130W
- ▶ Each port up to 30Watts
- ▶ 24-port or 16-port or 8-port with 2-port SFP or combo
- ▶ Advanced Graphical Management
- ▶ Auto Topology, E-Map, Floor-Map
- ▶ Graphical VLAN Group Setting
- ▶ Wireless AP Management
- ▶ Auto recover crashed PoE AP/Camera
- ▶ ONVIF PoE Camera Live View
- ▶ SNMP and Web Management, Tag VLAN, IGMP and more
- ▶ DHCP Snooping prevents unauthorized router installed

Web Smart POE Switches

► Overview

The AirLive Web Smart Managed POE Switch supports Web-smart management such as VLAN, QoS, IGMP Snooping, Port Mirroring, PoE on/off, Spanning tree, password-protected access, and more. The POE-GSH2824-210 supports 24-port PoE at Gigabit speed and 4 SFP for fiber Optic connectivity. There are also 10-port PoE switches with Gigabit uplink either over Copper or Fiber connection for hub station. The series are very suitable for most CCTV or Wireless AP applications.

Unmanaged POE Switches

Overview

The AirLive Unmanaged PoE switch delivers both data and power over Ethernet to PoE devices such as IP Camera, IP Phone, and Wireless AP. Supporting both 802.3at and 802.3af standards, it can provide up to 30W per port at a cabling distance of up to 100meter. Moreover, the Gigabit Fiber uplink port can be used for longer distance or cross-floor connection. The series provide simplicity, reliability and lower long term ownership cost.

Highlights

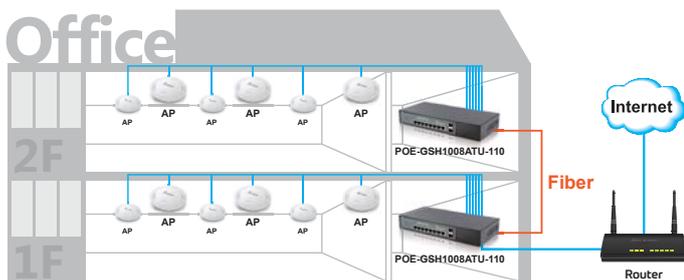

- ▶ 802.3at/af unmanaged PoE switch series
- ▶ 10/100/1000Mbps or 10/100Mbps
- ▶ Gigabit Copper or SFP Uplink ports
- ▶ Up to 30 Watts full power per PoE port
- ▶ High Quality PoE Power module
- ▶ Data/Power delivered over Cat5e/6 Cable up to 100m
- ▶ Rack-mountable for POE-GSH1008ATU-110

-  Broadcast Storm Control
-  Security Control
-  SFP Fiber
-  SNMP
-  Topology

Industrial Switches

► Overview

Unmanaged Industrial switch

AirLive Industrial switches support -40°C to 75°C in IP30/31 rugged strong housings with redundant power input that can work in harsh environment. For applications were wider temperature coverage and strong housing is preferred as well as DC power input but management functions are unneeded, the AirLive unmanaged Industrial switches can be suitable.

Voltage Boost Industrial switch

AirLive Voltage Boost Industrial switch supports wide voltage power input range from 12V~48Vdc, or 12V~36Vdc and regulate at 48V output. The Voltage Boost Industrial switch series can be the ideal switch for applications were standard PoE is required like surveillance device but where only low DC power sources are available, such as vehicle or tramway, Solar System, or factory where power source unstable.

► Highlights

- ▶ **Reliable and Industrial-grade Switches**
- ▶ **Din-Rail and IP30/31 rugged strong case**
- ▶ **Wider Temperature -40°C~75°C for harsh environment**
- ▶ **Dual Power Input 48~56Vdc with redundancy**
- ▶ **Voltage Boost 12V~48Vdc or 12~36Vdc in option**
- ▶ **10/100/1000Mbps or 10/100Mbps SFP or RJ45 Gigabit uplink port**
- ▶ **802.3at PoE, up to 30W per port**
- ▶ **AirLive Ring Managed Industrial Switch series**
 - Web-smart and SNMP for Ring Managed Series
 - Network recovering time faster than 20ms
 - AirLive Ring and Chain supported
 - Multiple Ring supported

Industrial Ring Manage Switch to Secure reliable applications

► Overview

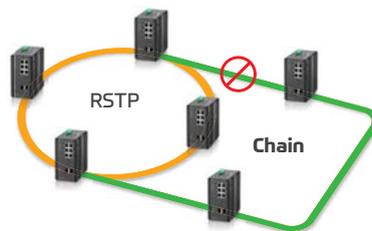

Thanks to the unique Ring back-up function and dual power input design, AirLive Ring Managed Industrial PoE Switch supports the best networking redundancy for mission critical environments such as factory, traffic light or energy industry. In the event of a network device failing, the AirLive Ring switch can provide recovery speed of less than 20ms that is much faster than a conventional RSTP switch which takes around 10 sec. The fast recovering time fully ensures that the network continues to operate without disruption. Moreover, the series supports "Chain" function with which you can expand established networking systems easily.

Smart Communication 4G/LTE

► Overview

The AirLive Cellular gateways include outdoor AirMax4GW, industrial grade VH-4GW with power input 9V~36V and, Serial to LTE M2M Industrial IoT Gateway. The 4G/LTE family is the easiest way to deploy Wi-Fi hotspot service for building up smart city communication.

The M2M 4G/LTE is the marriage of Serial and Wi-Fi interfaces which is now getting more important for both business and industry applications. A Serial to LTE gateway allows system integrators to connect legacy serial devices to Ethernet via wireless WAN (LTE/3G), providing many options for data acquisition, device management and industrial control anywhere.

Reliable LTE cellular Gateway Application

► Reliable LTE cellular Connectivity for Real-Time Traffic Monitoring AirLive M2M or M2M-4GPOE

To improve and monitor traffic flow and notice incidents, road operators usually use cameras and sensors to collect real-time traffic information as well as weather or air conditions. The application uses AirLive 4G Gateway to transmit cameras streaming and serial sensors information from locations where it is not possible to have Fixed line internet.

► Real Time Video surveillance in bus AirLive VH-4GW or M2M-4GPOE

How to understand live situation in a moving bus is important especially in public transportation. AirLive LTE Gateway; VH-4GW or M2M-4GPOE, utilizes 4G LTE technology which can transmit the cameras or NVR streaming to a control room from the moving bus. The gateway also can be powered by car battery directly without any additional equipment.

► Hotspot Deployment for Rural Area AirLive AirMax4GW

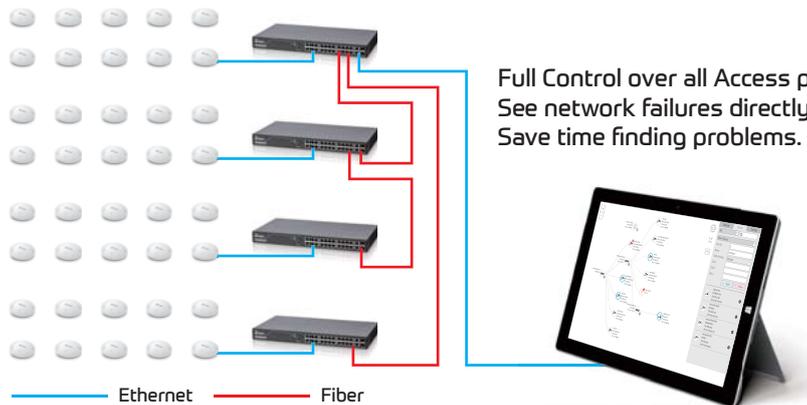

AirLive LTE Gateway is the easiest way to deploy Wi-Fi hotspot services. There is no limitation on wiring distance or location of Internet source. It is ready for deployment in any locations. Furthermore, it supports 802.1x, UAM server, and Captive Portal for easy integration with the operator's authentication network.

Smart Building Connect Wireless Solution for Hotel

► Overview

Hotel's Wi-Fi deployment by using AirLive's Access Point (AC.TOP) and PoE Switch (POE-GSH2624-370) in Mallorca, a famous summer holiday Tourism Island in Spain

Before the hotel owners decided to use our AirLive Solution, they were looking for a totally solution which could provide Wi-Fi coverage and was easy to manage for their hotels. The solution also had to be affordable and needed to be able to grow for future larger Wi-Fi demand. Finally they decided to use AirLive's Topology Device Managed Switch, POE-GSH2624-370 and Dual Band Ceiling Mount AP, AC.TOP for their hotels.

► Why AirLive Solution

Combing AirLive's managed AP (AC.TOP/N.TOP) and device managed switches POE-GSH2624-370, provided the lowest cost solution for a Wi-Fi AP managed system. This because the Topology switch can directly manage all AC.Top access points in the network. Saving time for the hotels MIS when for example 10 access points need to get a new SSID, all of them can be changed via the switch in one go.

Because AirLive's managed solution does not require an expensive license fee or has a limitation on numbers of AP. When there is the need to increase the Wi-Fi coverage, the hotel owners only need to add more AC.TOP and POE-GSH2624-370 and do not need to worry about any extra license fees.

*POE-GSH2624-370 Full PoE power Topology Switch
Topology view, Map view, Google map, Graphical Vlan setup, 802.3at/af full power.
24 port Gigabit and 2 port SFP.*

*AC.TOP Dual band high power Ceiling mounted AP
2.4 and 5Ghz, 100 Concurrent users, high power output, build in Radius server.
Gigabit network port.*

Topology Manage PoE Gigabit Switch Series Specification

► Overview

AirLive® Topology Managed PoE Gigabit Switch supports "Auto-Topology", "Google-map view", "Floor-map view", "Camera live streaming", "AirLive AP management" and more. Thanks to its Device Guard function which monitors and reboots your PoE Camera or AP automatically. These are the best switches for surveillance and AP troubleshooting. The graphical VLAN makes VLAN setting very easy by clicking models in the topology and done.

Industrial Switch Series Specification

► Overview

AirLive® Industrial Switch provides non-blocking wire-speed performance and great flexibility for Ethernet extension in harsh environment. It equips an IP30/31 rugged strong case with redundant power system and a wider temperature -40°C ~ 75°C is supported. AirLive® Industrial Switch is well suited for applications in deploying street surveillance system, securing access control and wireless service in climatically demanding environments such as factory or public transportation. The Ring Management series support recovering time faster than 20ms that ensures productivity without disruption.

LAN Switch Series Specification

► Overview

AirLive® SNMP LAN switches deliver Topology, SNMP, or WEB-Smart management functions for SMB or Enterprises. The all-fiber switch 24-port can be used to cluster all fiber connections from each floor or division. The SNMP-24MGB Plus supports L2+ SNMP and Graphical Topology management.

► Product Series

L2+ SNMP and Topology	L2 SNMP	Unmanaged	Fiber Converter / Transceiver

Model	MC-1000SFP
Hardware	
	Gigabit RJ45 and SFP Fiber Converter
	1 SFP GbE Port
	1 RJ45 GbE Port
	802.3x flow control
	Auto MDI/MID-X for TX port

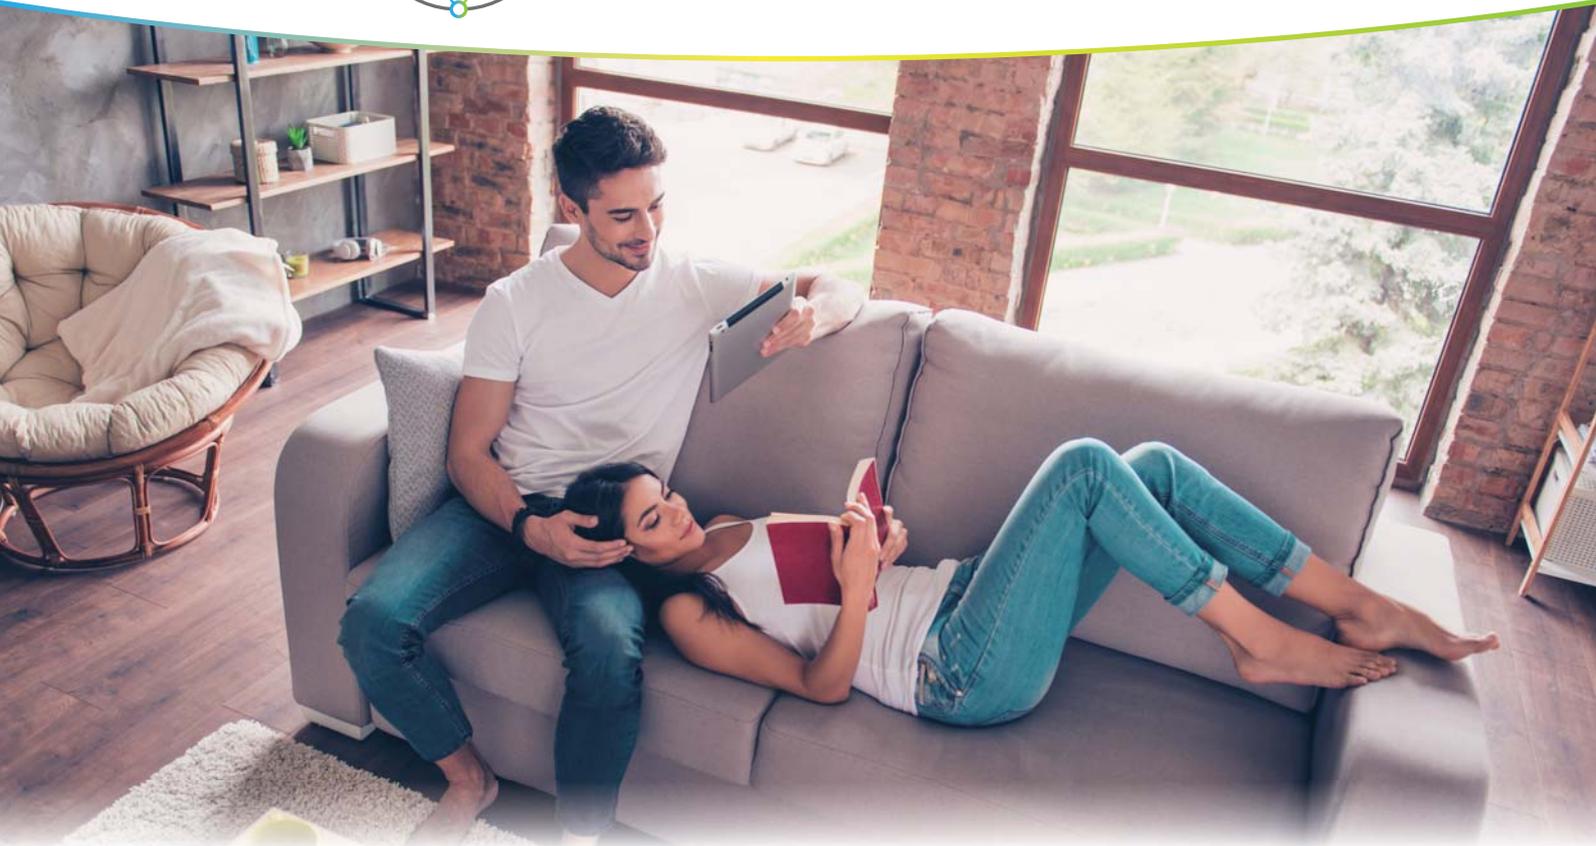

Model	SFP-LX-10
Hardware	
	1000Base-LX MiniGBIC Transceiver
	1310nm FP, 10KM
	Duplex LC Connector
	Hot Pluggable

Model	SFP-SX
Hardware	
	1000Base-SX MiniGBIC Transceiver
	850nm VCSEL, 500m
	Duplex LC Connector
	Hot Pluggable

Air Live
Smart Life IOT For Home

LET YOUR HOME BECOME SMART

AirLive Smart 2.0 IOT solution Automated Your Home

AirLive Z-wave Plus Smart Life IoT can be seen as Smart 2.0 for Automated Home. You can use your smart-phone with "AirLive Smart Life IoT APP" installed to manage and set or change Event conditions anytime and anywhere.
