

Smart IoT Product Catalog

2019 | AirLive Smart Home

Company Introduction

Since its establishment 25 years ago; AirLive, OvisLink Corp. has transformed itself numerous times as the technology world progresses.

However, the core values that we have accumulated and endeared stay the same. Great products are built upon solid user experiences, reassuring reliability, impeccable practicality, and sincere after-service.

Since 2016, AirLive has introduced a series of Smart Home products for DIY and S.I. installation. It requires almost zero setup. So you can get your smart home up and running quickly.

2019

Operation of AirLive Smart IoT Cloud

2018

Introduce Alexa and Google Home Voice Support

2016

AirLive introduces Z-Wave Smart Home IoT Product line

2014~2018

Development of Industrial Switch and 4G LTE product

2001~2015

Introduction of AirLive brand and WiFi series

1993 to 2001

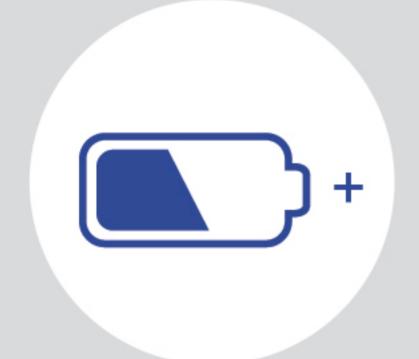

Development of Ethernet Switch and adapter

1993

Establishment of OvisLink Corp in Taiwan

AirLive's Smart IoT products are built upon the Z-Wave Plus technology. It is a wireless technology that is built purposely for IoT.

Battery Life

Z-wave provides 2-3 years of battery life. More than 100 times comparing to WiFi

Security

Z-wave Plus supports 128-bit AES encryption to secure the system from tampering

232 Devices

Each Z-Wave Gateway can connect up to 232 devices stably. It is far greater than WiFi and Bluetooth.

Wall Penetration

The Z-Wave operates in ultra low frequency. That means it has much better wall penetration ability comparing to WiFi or Bluetooth

MESH Network

Each AC Powered Z-Wave device acts as a wireless repeater to extend the wireless coverage

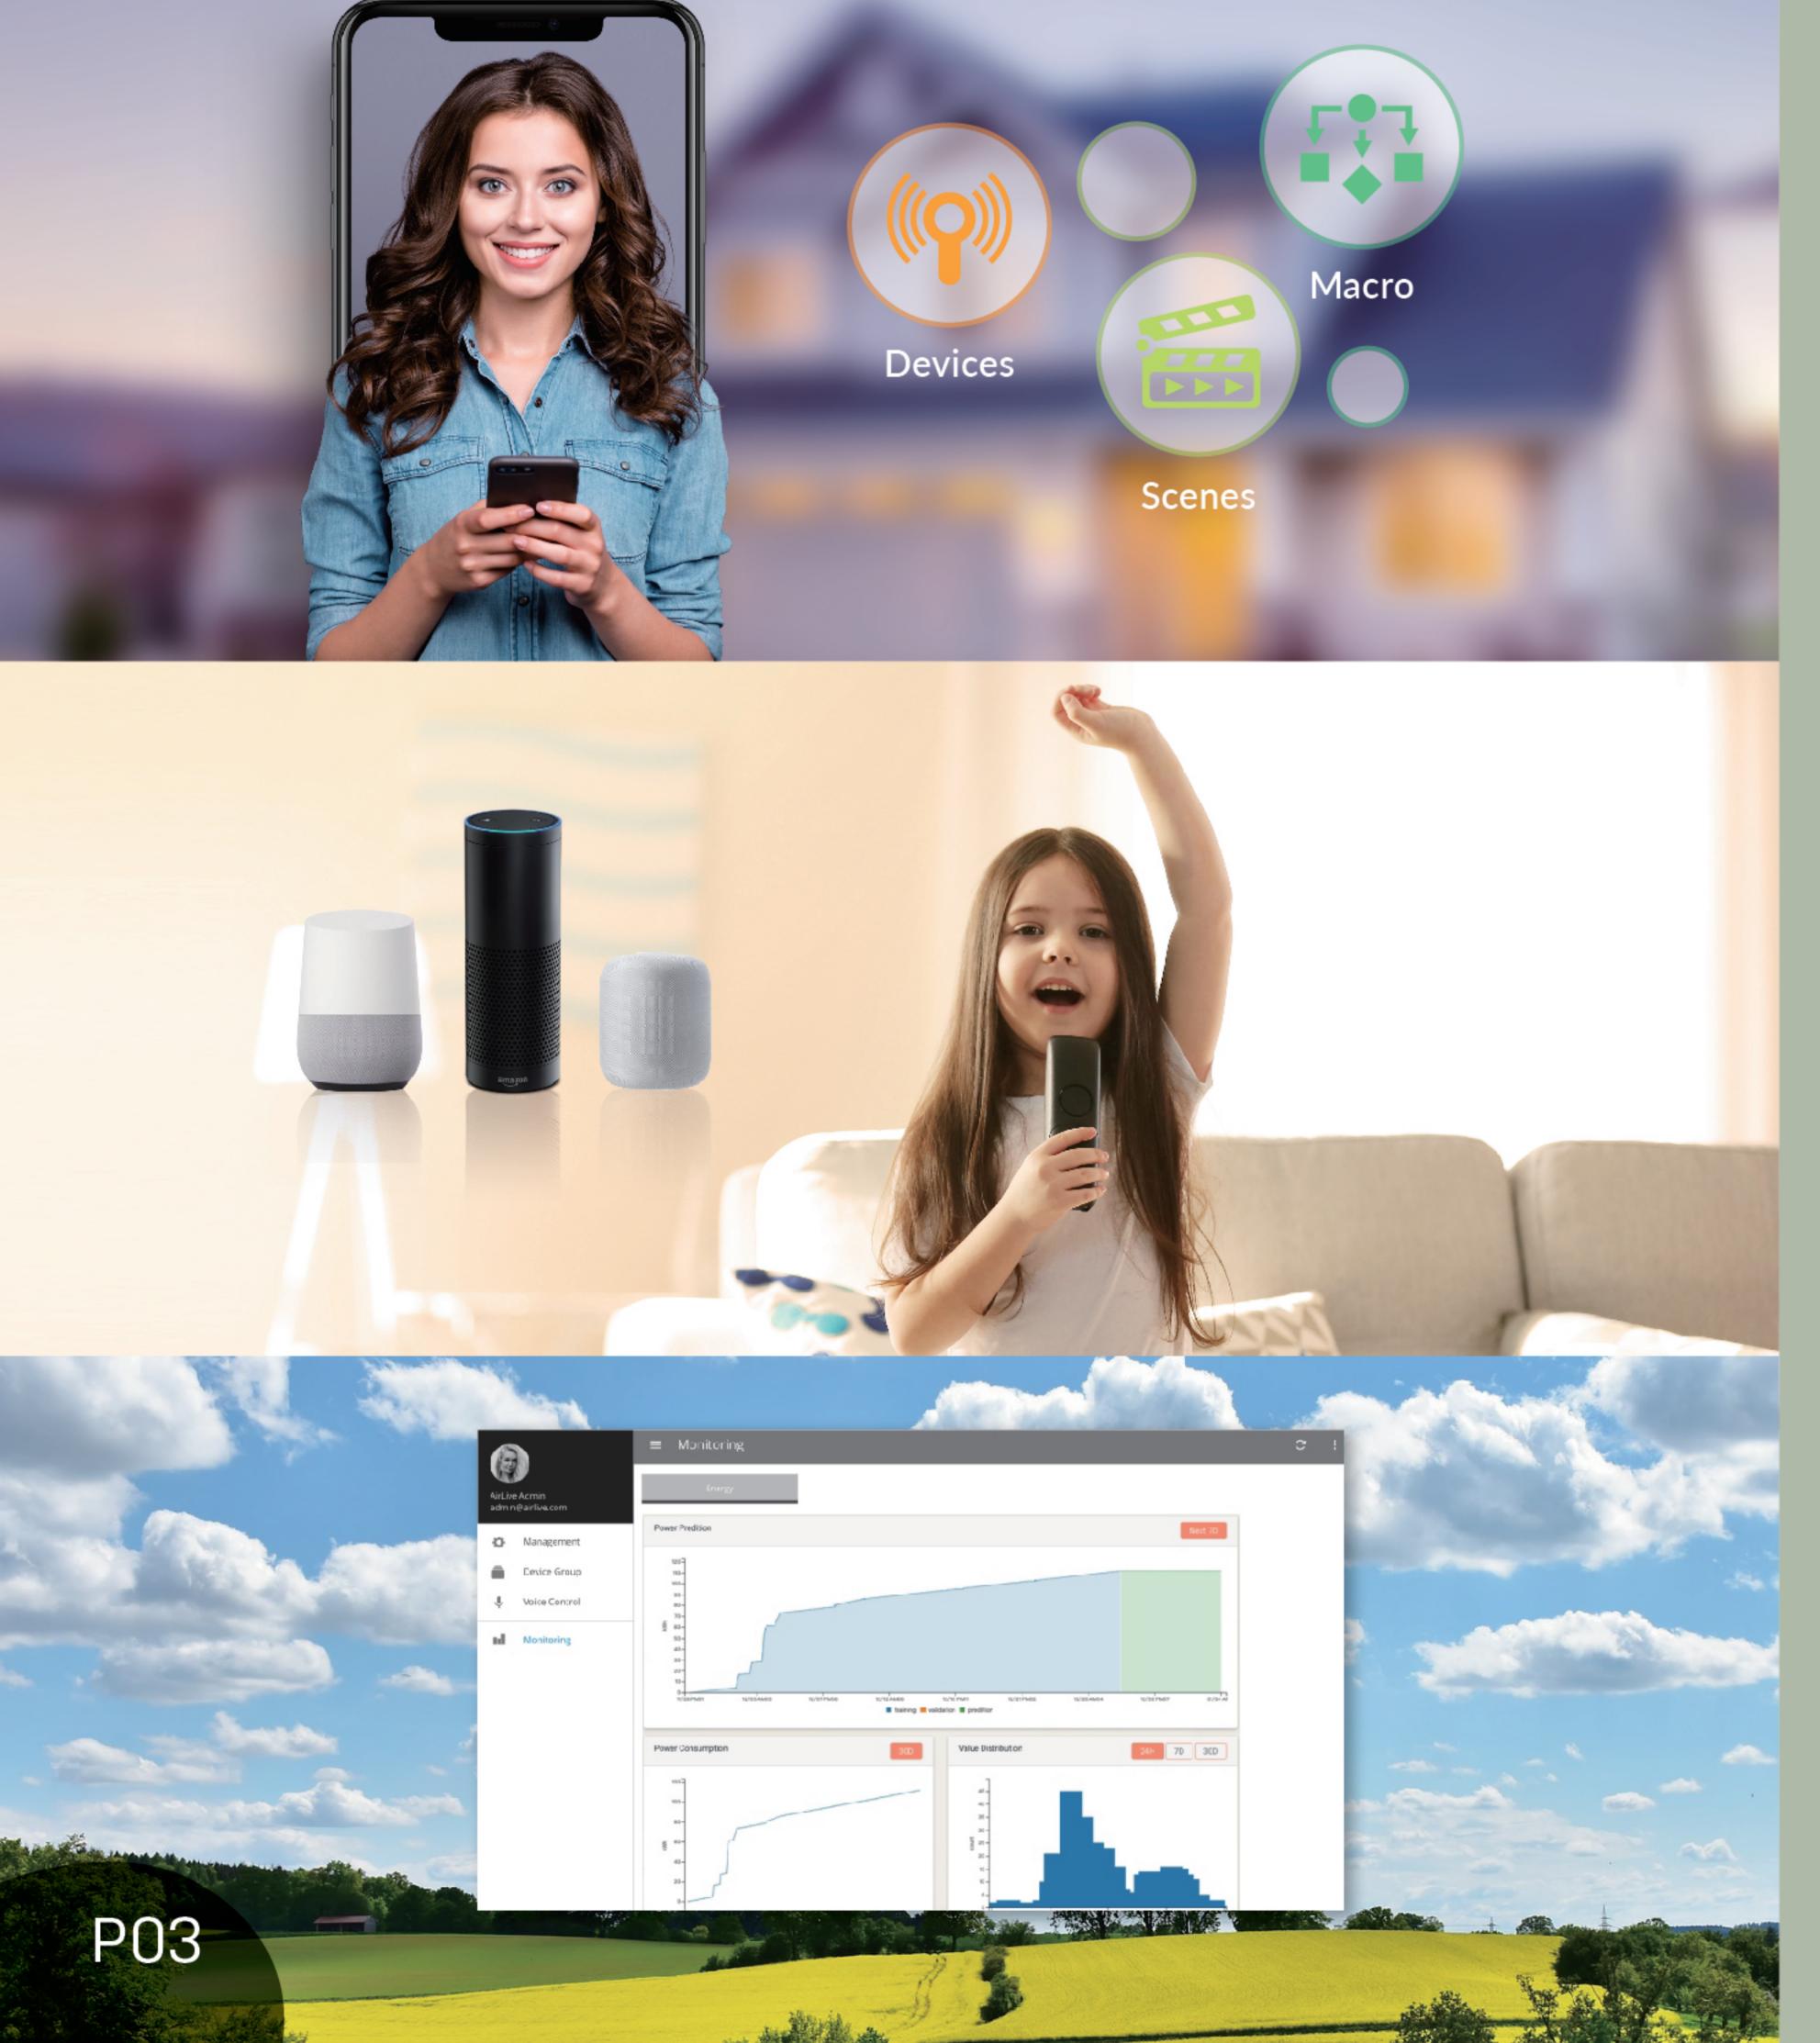

Wake-Up Time

Z-Wave can wake up from sleep mode in less than 0.5 seconds. It is far shorter than 30 seconds using WiFi. This makes it suitable for IoT

Humanized Automation

AirLive offers numerous ways to control your Smart Home, you just need to choose which is the most natural to you.

User Friendly APP

Our user friendly smart phone APP that includes sophisticated features such as Scenes and If-this-then-that Macros which make all automation possible.

Voice Control

Comprehensive voice recognition supports including Amazon Alexa and Google Home. Each command is mapped to a scene you created. So, you can just say "I am home" then all the lighting and air conditioning are set according to your wish

Smart IoT Cloud

Our cloud allows auto-detection when leaving your house. Moreover, it provides the possibility to multi-home, multi-user, trigger history, and energy consumption

Voice Control

Through Amazon Alexa or Google Home, you can easily control your smart home by voice. AirLive supports both Alexa Home Kit and Alexa Skill Kit. So you can choose to speak directly or customized according to the Scene. It is both powerful and convenient.

SmartLife Plus APP Scenes

Create different combination of activities using the scene tools. You can create a scene base on a location such as living room. On the other hand, you can also create a scene base on an occasion such as party mode, theater mode, or welcome home schemes. You can even set automatic activities when you are away from home.

IFTTT (If this then that) Macros

The SmartLife Plus supports IFTTT (If this then that) protocol. Therefore, you can setup certain conditions to trigger some events. So whether it is for home security, temperature control, or home automation, the APP has a solution for you.

Illumination < 10%

and

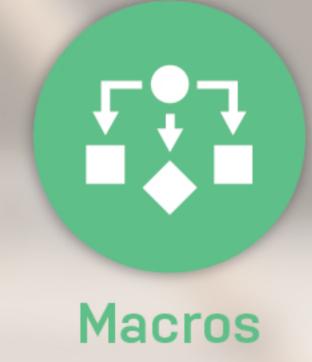

Then Turn on the Light and

Time is after 6pm

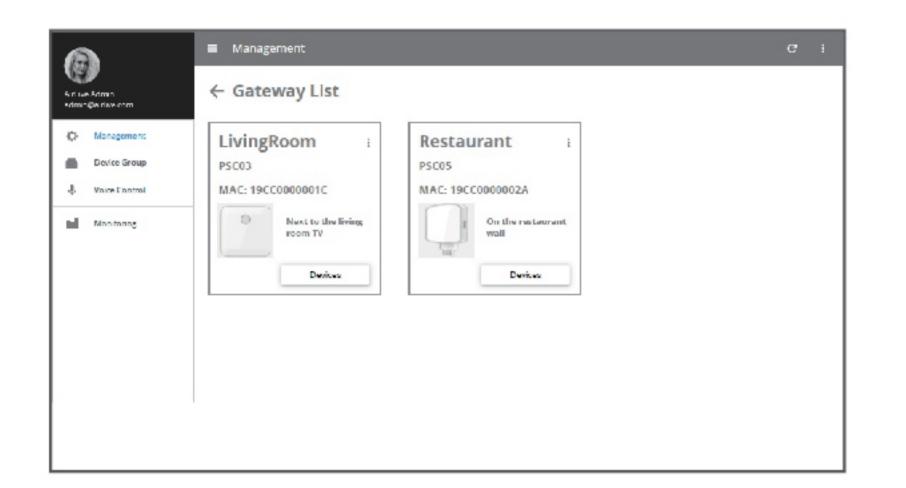

Close the curtain

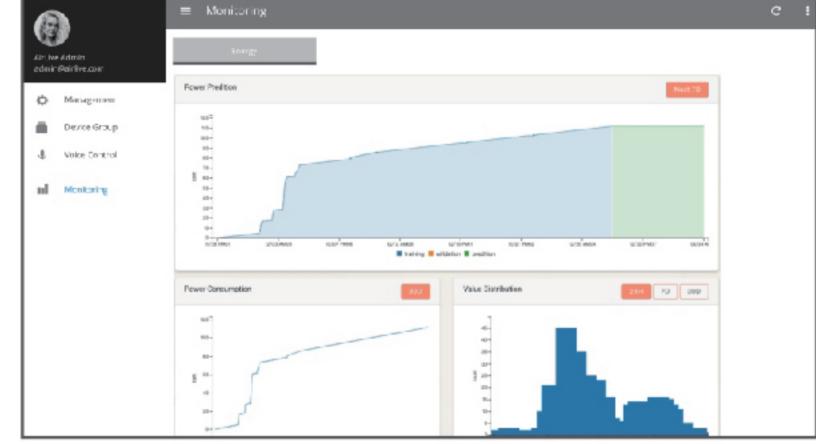

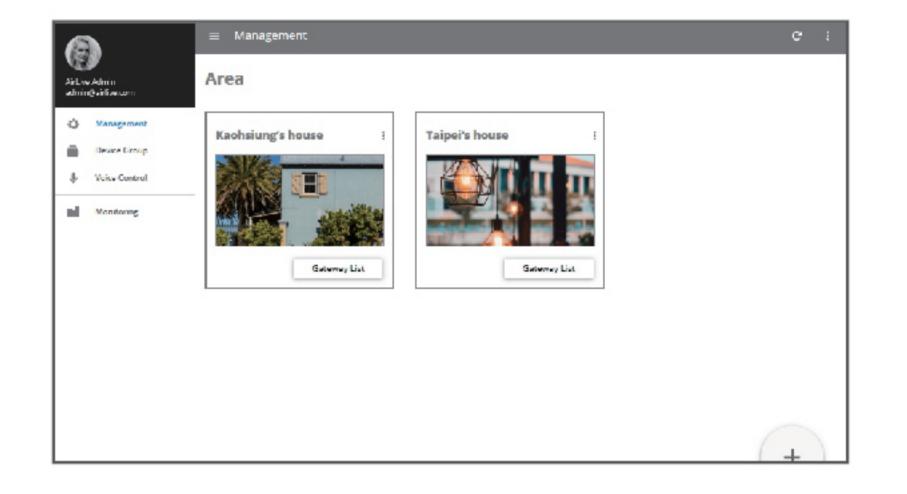

Smart IoT Cloud

AirLive provides smart IoT cloud that allows you to manage multiple gateways in multiple locations. You can remotely turn on/off functions or watch the overall statistics. It is ideal for large home or community deployment.

Multiple Gateways

The IoT Cloud enables you to manage multiple gateways.
Therefore, if you have a large house or multiple houses, the IoT Cloud allows you to set Scene or Macro across different gateways.

Show the Statistic

See how many times the windows and doors have been triggered in the week. What is the energy consumption totally.

Multiple Locations

You can manage different houses in different locations across the world

Smart Home IoT: Making your home a better place

With the advancement of IoT technology, Smart Home is not just something nice to have. AirLive has packaged them to different practical applications. For the first time, Smart Home is something that one must have after they have gone through the AirLive experience.

Home Security

Home Automation

Elder Care

Parental Control

Energy Saving

AirLive Smart IoT

Atrium

When someone opens the door, the SI-101 3-in1 door sensor will alert you when you are not home. The SC-300W IP Camera lets you see who has entered the house. The SI-102 PIR sensor will turn on the light when a person is detected in the atrium.

Living Room

Install the In-Wall power control to your TV. You can then limit the time when the TV can be turned on. The SI-108 universal remote control can turn on your TV or your air conditioner according to the temperature. With SA-105 Touch Wall Switch light dimmers installed, you can turn on the essential lights for the theater mode.

Kitchen and Dining Area

Add our SI-104 smart Smoke Detector in your kitchen in case there is a fire. It will alert you where ever you are. Install the SI-103 Flood Sensor under the sink, it will report water leakage from the faulty water pipe.

Bedrooms

With SD-101 installed, you can voice control the lights. In addition, the SD-103 RGBW controller can set your color LED in different lighting schemes to create ambiance on occasion.

Stairway

In the stairway, you can install the SI-102 Motion Sensor and the SA-102 In-Wall Power Control. So the light will turn on automatically when a person is detected

Garage

Setup your IFTTT rules so that your garage will automatically open when you are approaching your home. In addition, you can check if you have forgotten to close the garage door. If yes, you can remote close the door by using our APP.

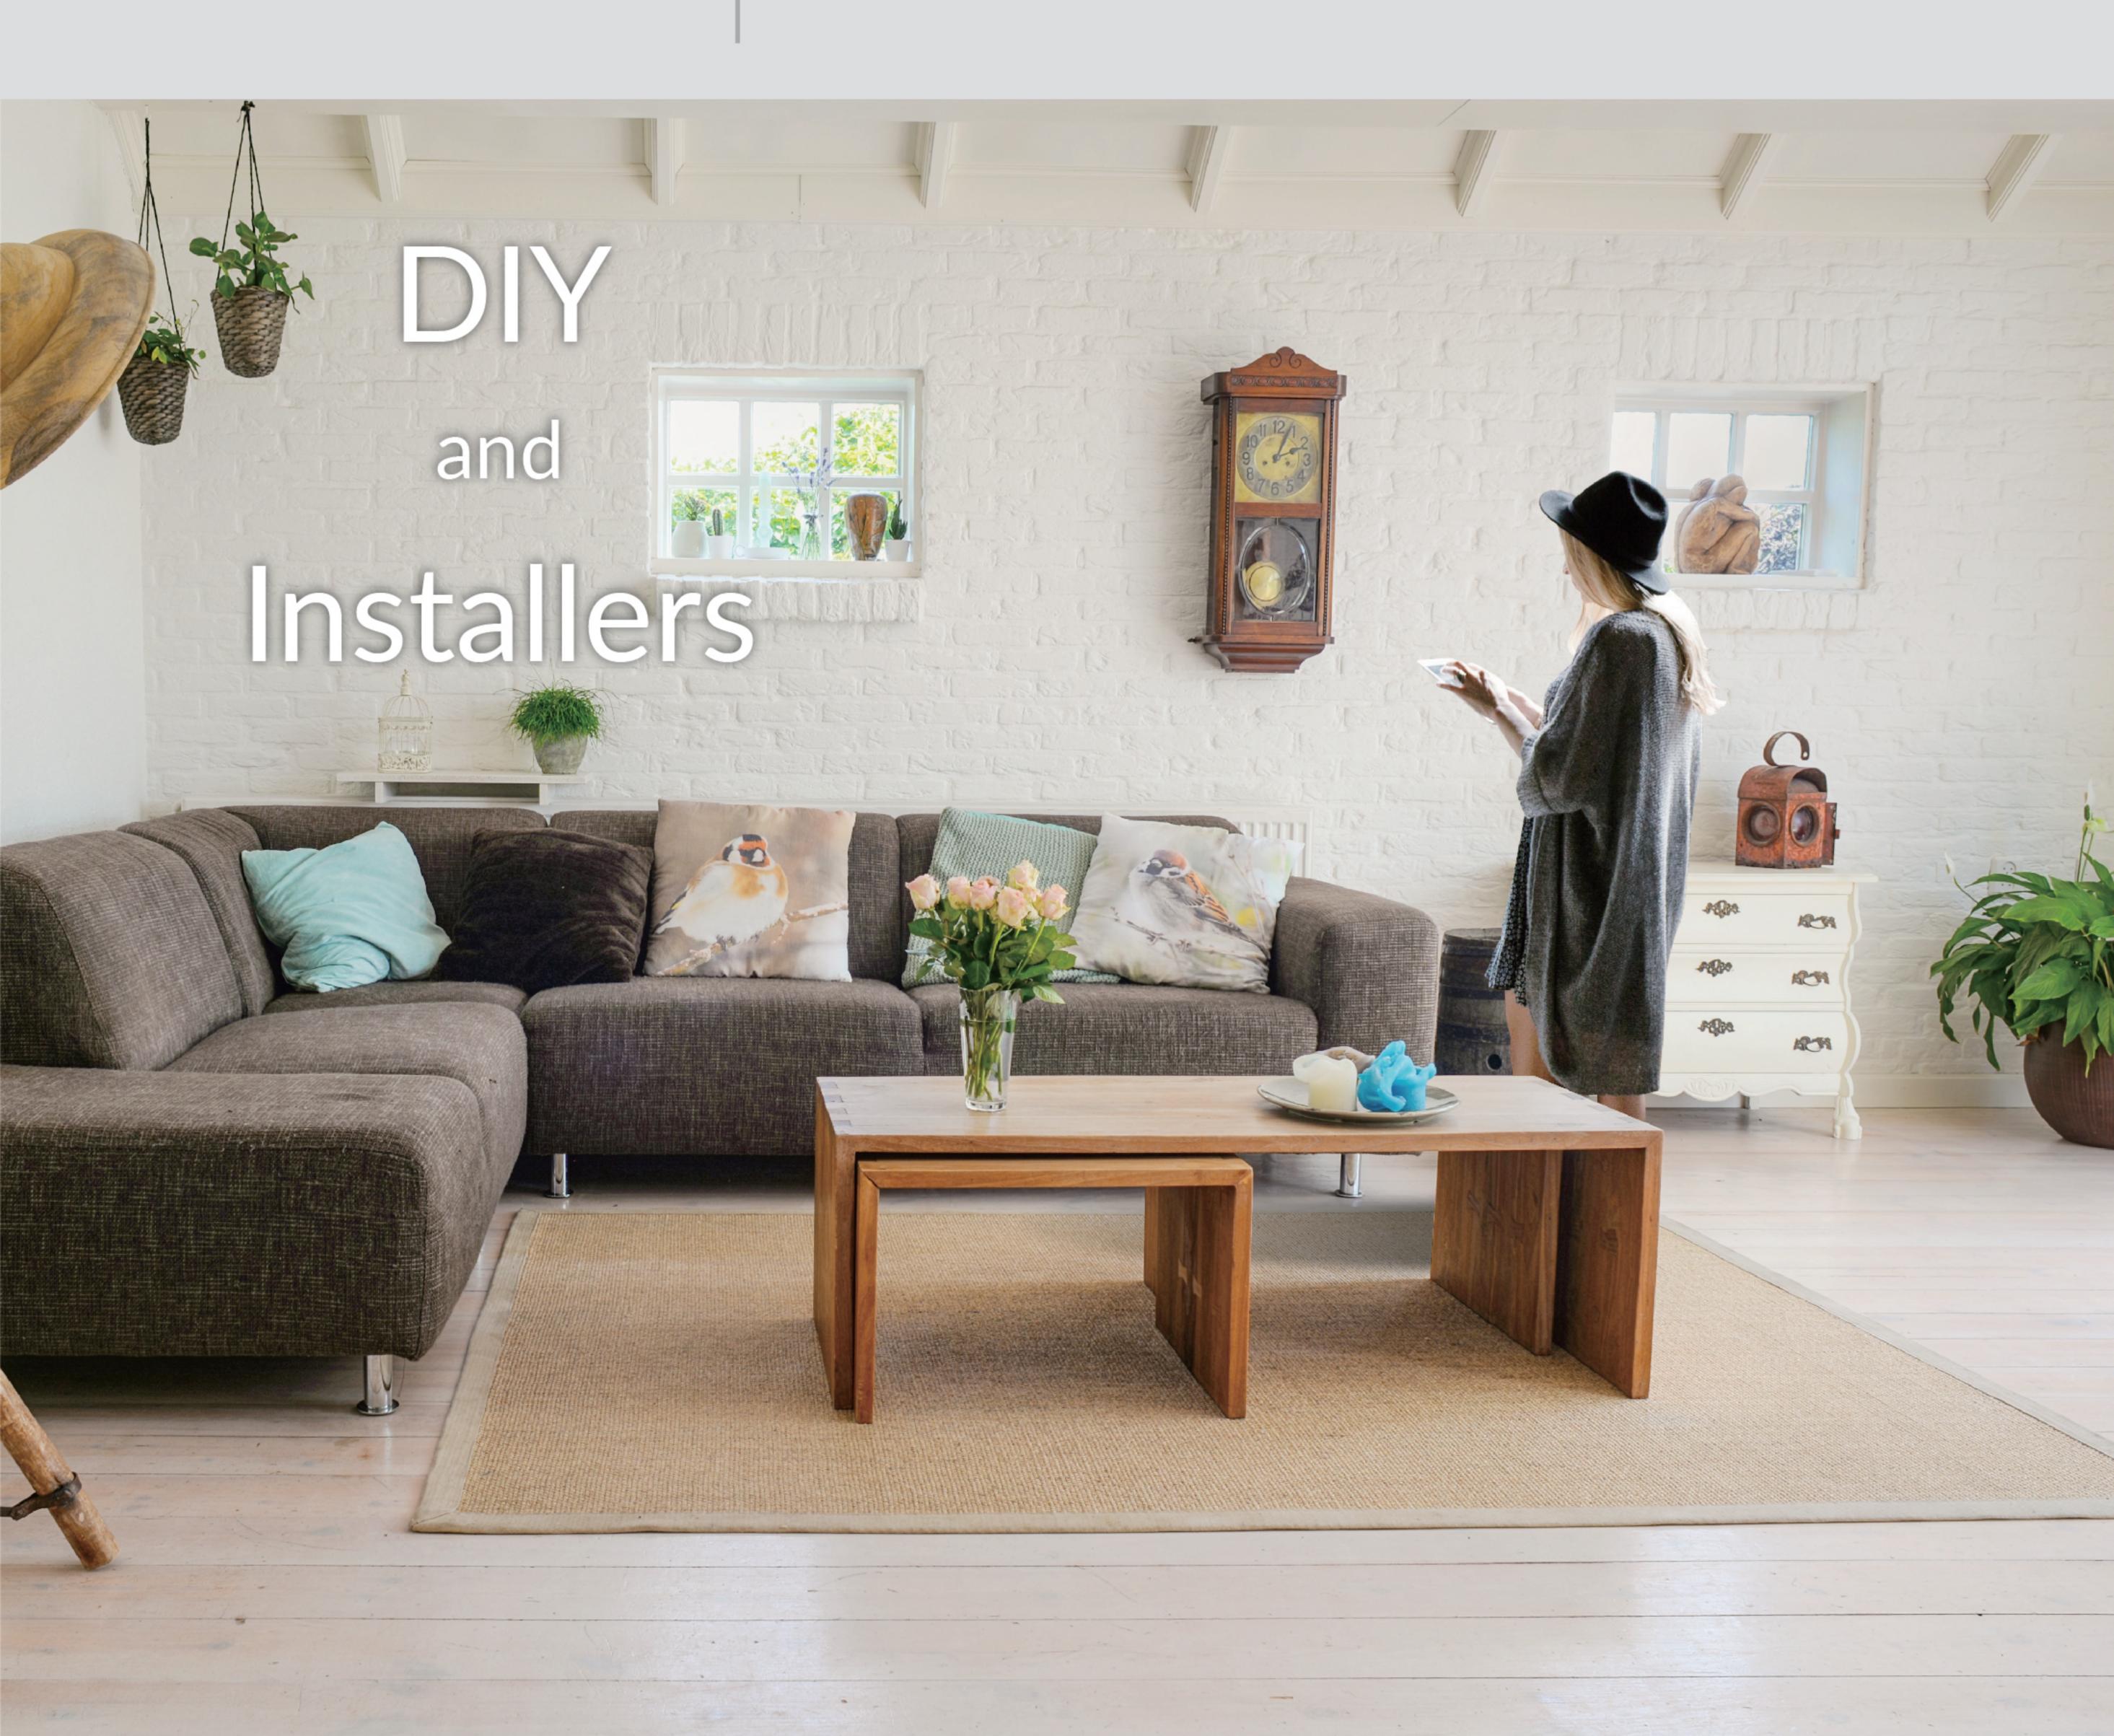

Simplicity is Just a Start

Many vendors say their smart home is use to use, but it gets harder than you think when you actually try it. When we say simple, we mean the products require almost zero setup. All our Smart Home IoT starter kits come pre-paired which means they are ready to go right out of the package. It just couldn't get any simpler.

For both DIY and Installers

AirLive offers DIY kits with come pre-paired for easy installation. For professional installers, we also offer in-wall switch, dimmer, and curtain/garage opener. Whatever is suitable for your market, we have a solution for you.

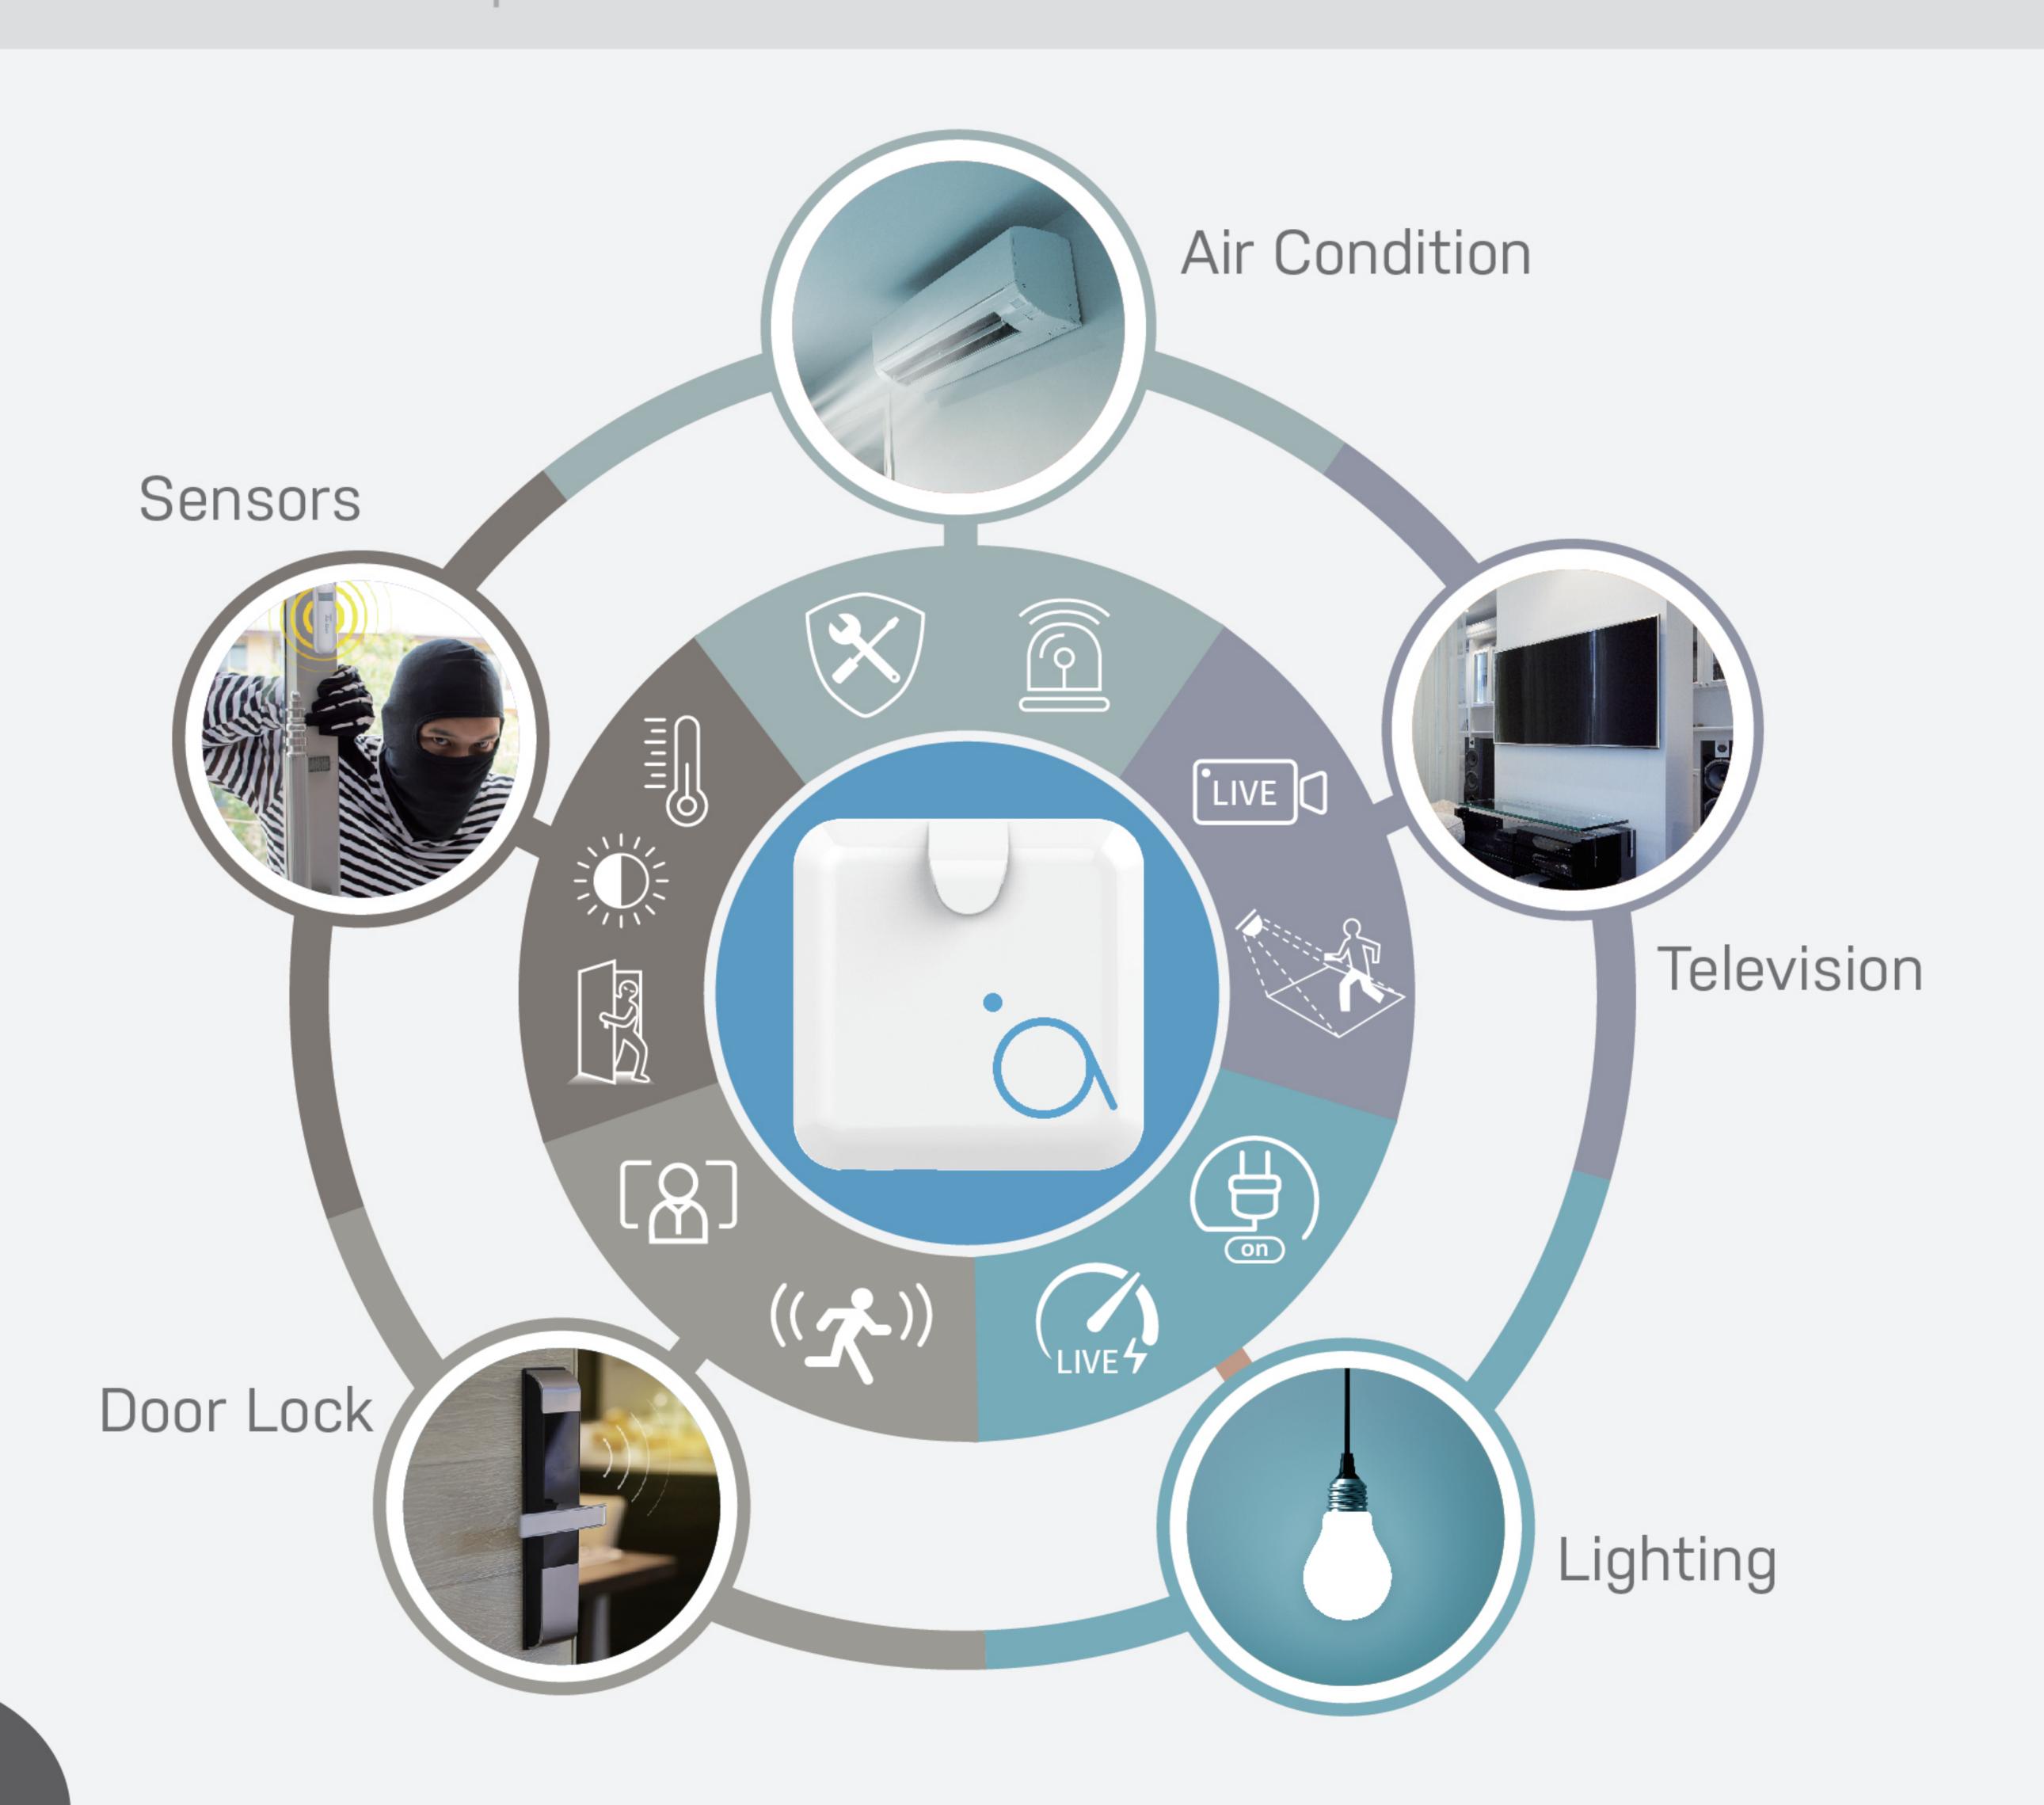

Pervasive Compatibility

AirLive's IOT gateway is integrated with hundreds of third party devices such as Yale locks, Philips Hue, and many more home appliances.

Moreover; through the IFTTT, you can also work with thousands of product from other makers.

Therefore, your AirLive Smart Home will work with ever expanding list of new IoT products on the market.

Sensors

SI-101 3 in 1 Sensor

Door and Windows Sensor
Temperature Sensor
Illumination Sensor
2 to 3 year battery life

SI-102 PIR Motion Sensor

Detects Motion
Adjustable Distance
Up to 8 Meter
Magnetic Cover
2 to 3 year battery life

SI-104 Smoke Detector

Alert you when there is fire or smoke
Built-in Alarm
Low battery life warning

SI-103 Water/Flood Sensor

Detects Water Leak
Safe Guard your bathroom
and Kitchen
2 to 3 year battery life

Lighting and Energy

SD-103 RGWB LED Controller

Adjust Color of your RGBW LED Strip
Turn on/off the LED by APP or Voice
Dimmer Control

SA-104 Push Button Wall Switch

Control 2 lighting devices
Turn on/off light by APP or voice
Replace your current wall switch
Control lighting or power

SD-104 Wall Dimmer

Adjust the brightness level of your light Turn on/off and brightness level by APP or voice Replace your current wall switch

SA-105 Touch Sensitive Wall Switch

Control 2 lighting devices

Touch activate and glass panel

Turn on/off light by APP or voice

Replace your current wall switch

Actuators

SI-108 IR Remote Control For Air Con

Control your air conditioner Built-in AirCon List Ability to learn the command from another remote

SD-102 Light Bulb Dimmer

Convert your light bulb to smart lighting Dimmer Control through the APP E27 to E14 screw type

SmartCube-300W 3MP IP Camera

3 Megapixel Recording Built-in PIR sensor Built-in Temperature Sensor SD Card Slot

Actuators

SP-101 Smart Plug

Turn On/Off appliances
Energy consumption monitoring
Power scheduling
3000 Watt Resistive Load
Z-Wave Repeater

SA-102 In-Wall Power Control

Turn On/Off Lighting
Turn On/Off power devices
Up to 1560W Resistive Load
Z-Wave Repeater

SD-101 In-Wall Light Dimmer

Adjust the brightness of your dimmer light
Z-Wave Repeater
Install into the wall socket

SA-103 Roller Shutter Control

Control the smart curtain
Control garage door
AC Type
Z-Wave Repeater

Controller

SG-101 Z-Wave Gateway with Siren

Z-Wave Plus gateway

Built-in 11n WiFi

RJ-45 Port

6-tone Siren

Heart of AirLive IoT devices

SB-101 Emergency Button

Call for Help Button
Button for set the alarm on
Button for set the alarm off
Rechargeable battery

SR-101 Smart Button

Adjust brightness of the lighting
Adjust the curtain opening
Timer Control
Rechargeable battery
