Topology View

Topology Switch

Our Auto Topology switch offer the ability to draw a network diagram automatically, so you can manage and trouble shoot when there is a network problem. It can also see live view of your ONVIF cameras. As matter of fact, every network should have at least one Topology Switch for diagnostic purpose.

PoE Switches

AirLive's PoE Switches are made in Taiwan. They offer full power for each port and full 100 meter cable length for stable and quality connection. Our PoE switches include the entire range in topology/SNMP managed and unmanaged switches. Some of our PoE switches come with Device Guard function which will auto-reboot a connected device when it malfunctioned.

Dual Ring   *Ring Coupling*   *Dual Homing*

Industrial Switch

AirLive industrial switch are designed to operate between -30 to 70 degree. The premium models have SNMP management and hardware ring design. The hardware ring design allosw your network to repair itself within 50ms. It is perfect suitable for mission critical operations.
