Overview

Painless Upgrading your Network Connection to 2.5Gbps & SFP+ 10G Super High speed Web Management Switch.

The AirLive Multi-Giga switch, WEB-2TX801 is a Web Managed switch, which supports 8 RJ45 and 1 SFP+ ports for delivering up to 2.5Gbps extra high-speed connection on RJ-45 and 10G SFP+ on fiber optic. Supports WEB Management function and is easy to manage and maintain. The easy to operate WEB-2TX801 has several functions like VLAN setting for a more secure connection. QoS to have more control of the bandwidth and many more like, IGMP, Loop Prevention, Port-Base Mirroring, Port Isolation, Bandwidth Control, Security (MAC Address / table / search / static MAC; Storm control and more. With the 2.5G multi-Giga switch, you can connect to a variety of 2.5GbE-enabled devices, such as NAS | NVR | PC | Server | Laptop, for enjoying faster experience and handle bandwidth-hungry applications. Designed in a slim sized solid housing, it's an affordable, space-saving solution suitable to Home and SMB network applications.

Features and Specifications

AirLive WEB-2TX801 2.5Gbps Switch with SFP+ 10G

- 8x 10/100/1000/2500Mbps RJ45
- 1x 10G SFP+
- Web Smart Management
- QoS; Priority management
- VLAN: enhanced security and performance
- Loop protection
- All ports at Multi Gigabit high speed, auto-negotiation
- Providing satisfied bandwidth for various network devices, such as online gaming, multi-media, NAS, Server system
- Existing Cat5e cable suitable, painless upgrading
- Compact size for Home or SMB Network Connectivity

10/100/1000/2500 RJ-45 Port

10G SFP+ Port

VLAN for enhanced network security

The VLAN 802.1Q settings can be used to separate traffic within a business such as isolating resources between network administrators and general users or between employees and public guest users.

QoS for enhanced traffic control

QoS (Quality of service) is the ability to provide different priority to different applications, users, or video/voice/data flows, or to guarantee a stable level of performance to each data flow. This can be with Port-based Priority or Priority to queue.

Extensive configuration options

The Airlive WEB-2TX801 comes with many configurations' options including, IGMP, Loop Prevention, Port Mirroring, Jumbo Frame, Green Ethernet and more.

For the Security settings, there is Storm Control and Static MAC, also the Port Statistics can be monitored.

2.5 Times Faster

2.5GbE is 2.5 times faster than standard Ethernet (1GbE), upgrade network performance to boost productivity.

Cat 5e

Works with existing cables

No special cables or connectors are required to take advantage of 2.5GbE. Simply use your existing CAT5e cables as normal with your new 2.5GbE infrastructure.
