Overview

PJ-1001-30W

Ethernet 802.3at PoE Injector (PJ-1001-30W)

The AirLive PJ-1001-30W Gigabit Ethernet POE Injector is fully compatible with IEEE802.3af (15.4W) and IEEE802.3at (30W). The POE port supports a maximum output power of 30W, and the port supports 10/100/1000Mbps self-adaption. It supports AC 100-240V voltage input; the working temperature range is -20°C ~ +50°C, seamless ultrasonic bonding, better protection effect. It takes the electricity from the power source and the data from the Ethernet network and then combines them into a signal that can be transmitted through the UTP/STP cable up to 100m.

The product can be widely used in IP Camera, AP, 30W PoE PC-Panel, AP, digital signage display system, PoE LED, etc. Its reliable hardware design can ensure your automation system runs without interruption and stability.

1.1 Connecting PJ-1001-30W

Power on the device by connecting the AC cable first. Connect a RJ-45 cable from a switch/router to the PoE Injector's port called Data In, this is Data only. From the PoE Injector's PoE Out port a RJ-45 cable can now be used to Power On and transfer Data for, for example a PoE Camera or Access Point. The PoE Out port has both Power and Data.

AC Input

Green LED: Power On

For more detailed specifications please see the datasheet.
