

25 Years of Experience in Networking

AirLive, OvisLink Corp. was established in 1993 with over 25 years of experience in Ethernet switches and industrial networking. We offer comprehensive product solutions for SMB, IoT, and ISP.

Made in Taiwan

All of our LTE products are made in Taiwan for premium quality. They offer highest level of security and avoid increased tariff in the United States.

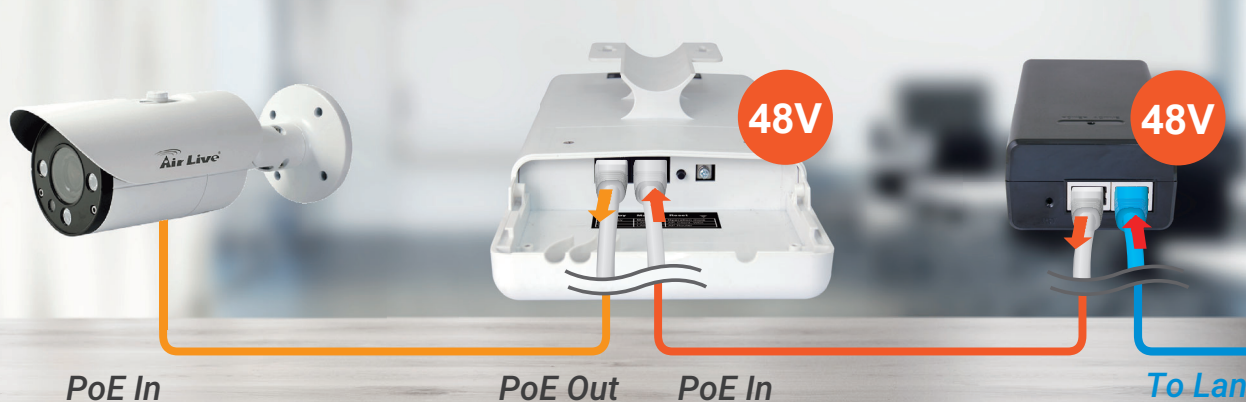

SMB WiFi

AirLive is well known in WISP as the pioneer of WiFi networking. All our AP and Router features multi-mode which can function as WISP router, repeater, bridge, AP, or router. They are also well known to offer double the coverage compare to the competition.

AirLive Central

AirLive Central is the central management software for AirLive Wireless product. You can do a group configuration changes and also upgrade the firmware on group. The interface is extremely friendly to use. The software is provided free of charge.

Outdoor CPE and AP

Our AirMax series of outdoor AP/CPE was the very first in the industry. They are known for their long distance or wide coverage. The 2.4GHz AirMax2 feature "Clear Signal Technology" that has reduce the effect of interference. Our AirMax-5n has a built-in PoE output port for direct connecting a PoE IP camera.

4G LTE Products

AirLive has the most complete 4G LTE products in the industry. They all support wide temperature range from -30 to 70 degree Celsius. The AirMax-4GW is an outdoor LTE gateway for WISP, camper, or vacation home. The VH-4GW is designed for transportation such as bus and fleet management. The M2M series including serial port and DIDO, it is designed for ATM, Kiosk, vending machine. The ID-4GW is very small but features 2 sim slot of failover, it is perfect for Office secondary Internet or digital signage operation.
